Notes & News

Week of October 24th-28th

Dear Families,

This week we are reviewing the skills and concepts learned throughout the first unit of our reading program. We are also using the theme of "exploration" to lead many of our activities. We'll be learning about famous explorers and how to use a compass and map. We are also integrating a great deal of technology into our lessons this week. For example, today we used "Smart Response Remotes" for the first time. The remotes are used to answer multiple choice questions that are on the Smartboard. We also investigated two new websites called Exploring Nature and Pebble Go. Both websites offer a ton of information about habitats and animals to help us prepare for our expedition on Wednesday! There should be plenty to talk about at the dinner table this week!
